Applicant's election without traverse of the process invention is acknowledged.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 41-44, 48-52, 56-61 are rejected under 35 U.S.C. 112, second paragraph, as being a purported process that includes no steps, phrases like "surrounding" and "forming", in this context having no process meaning.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim(s) 41-43, 48-52, 56-58, 60-61, to the extent they are definite are rejected under 35 U.S.C. § 102(e), as being anticipated by Katayama et al. The examiner finds all claimed subject matter to be present.
